DESIGNER SIZE CHART: [Sorella Vita Bridesmaids](#)

MEASUREMENT AND SIZE

In order to ensure the best possible fit, we highly recommend measurements be taken by a professional tailor/seamstress. This is an important part of the order process. Accurate measurements will enable you to select the size that will give you the closest fit. All special order merchandise is ordered according to manufacturer size charts. They are NOT custom-sized. Alterations are normally required.

Bust: Measure around the fullest part of your bust.

Waist: Measure around your natural waist (the narrowest part of your waist).

Hips: Measure around the fullest part of your hip.

After you have your measurements taken, refer to the size chart below and decide which size category you best fall closest to. Please note that bridesmaid sizing is different from regular department store sizing, and generally runs about 1-2 sizes smaller. As an example, if you wear a size 4 in regular clothing, you would be approximately a size 8 in bridesmaid sizing. These gowns are not custom sized. The designer recommends ordering a size based on your largest measurement and altering it down to fit. If your measurements fall between two sizes, choose the larger size. It is always easier to take in than letting out a garment when doing alterations. Please call your nearest location if you need help with sizing.
